

PRODUCT DATA

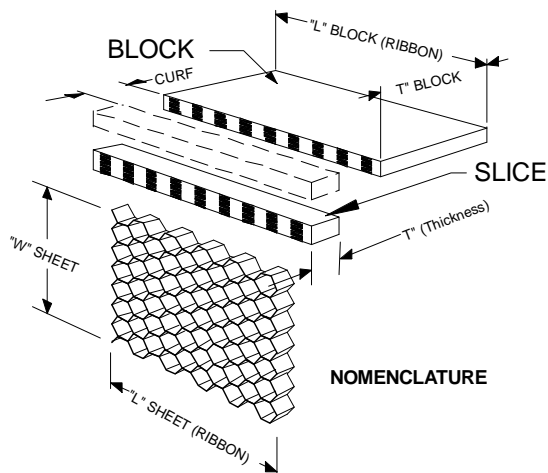

SST

STAINLESS STEEL HONEYCOMB

UNICEL® is a new metallic honeycomb product developed for adhesive bonded panels. Especially appropriate where the unique properties of stainless steel are desired and the cost effectiveness of bonded panel construction is a necessity. Because of our patented process, SST can now be manufactured in a very economical manner when compared to welded stainless steel honeycomb.

TYPICAL PROPERTIES:

- Excellent Corrosion Resistance
- Won't burn or produce smoke
- Very high melting point
- Impact resistant
- Easily Formed
- Nonhydroscopic
- Nonmagnetic
- Bond Ready
- All features of Austenitic Steels
- Strength of Stainless Steel
- Cannot rot

Manufactured by:
